

SUPPLEMENTARY DATA

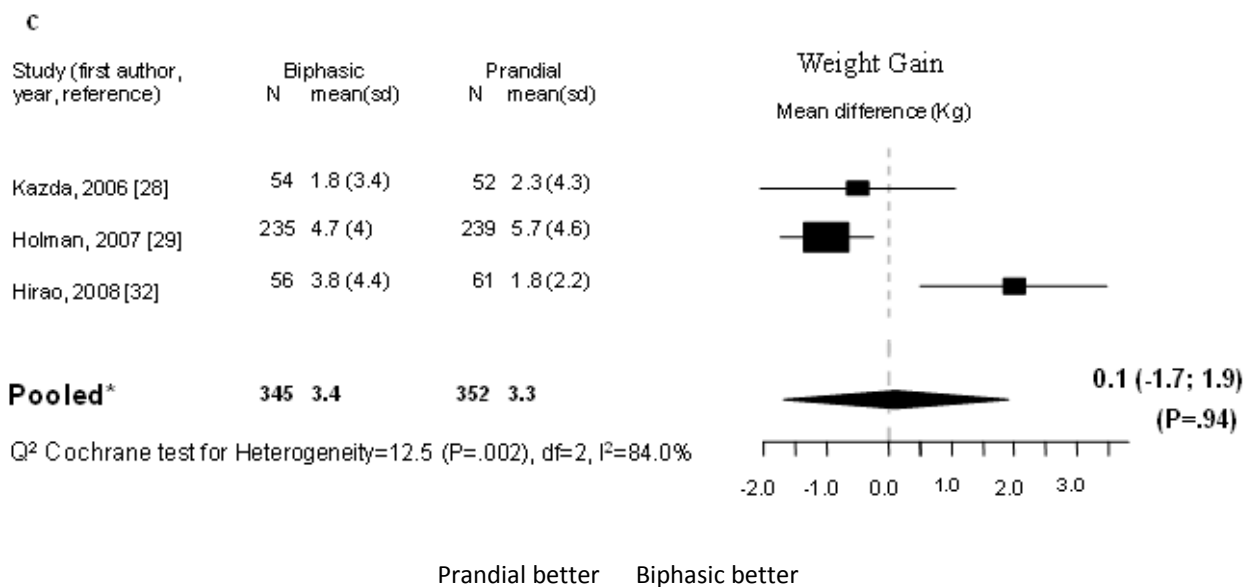

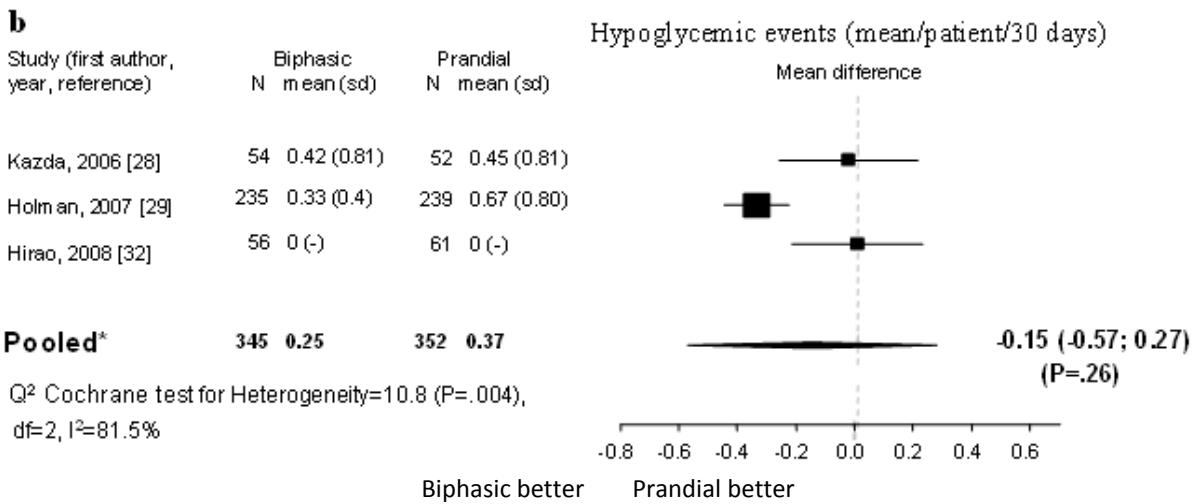

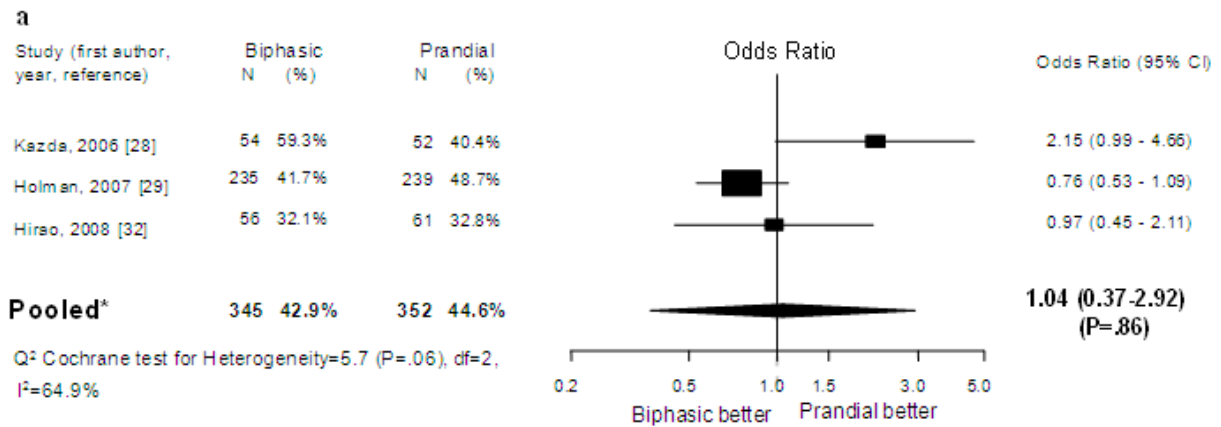

Supplementary Figure 1. Systematic review flow diagram; n=number of trial reports.

SUPPLEMENTARY DATA

Supplementary Figure 2. Biphasic versus prandial. Outcome, proportion (%) of patients with HbA1c <7% (a), change in incidence of hypoglycemia (b) and change in weight (c).

N=number of patients in each arm. *Mixed effect model: estimates adjusted for the correlation within studies and heterogeneity between studies.

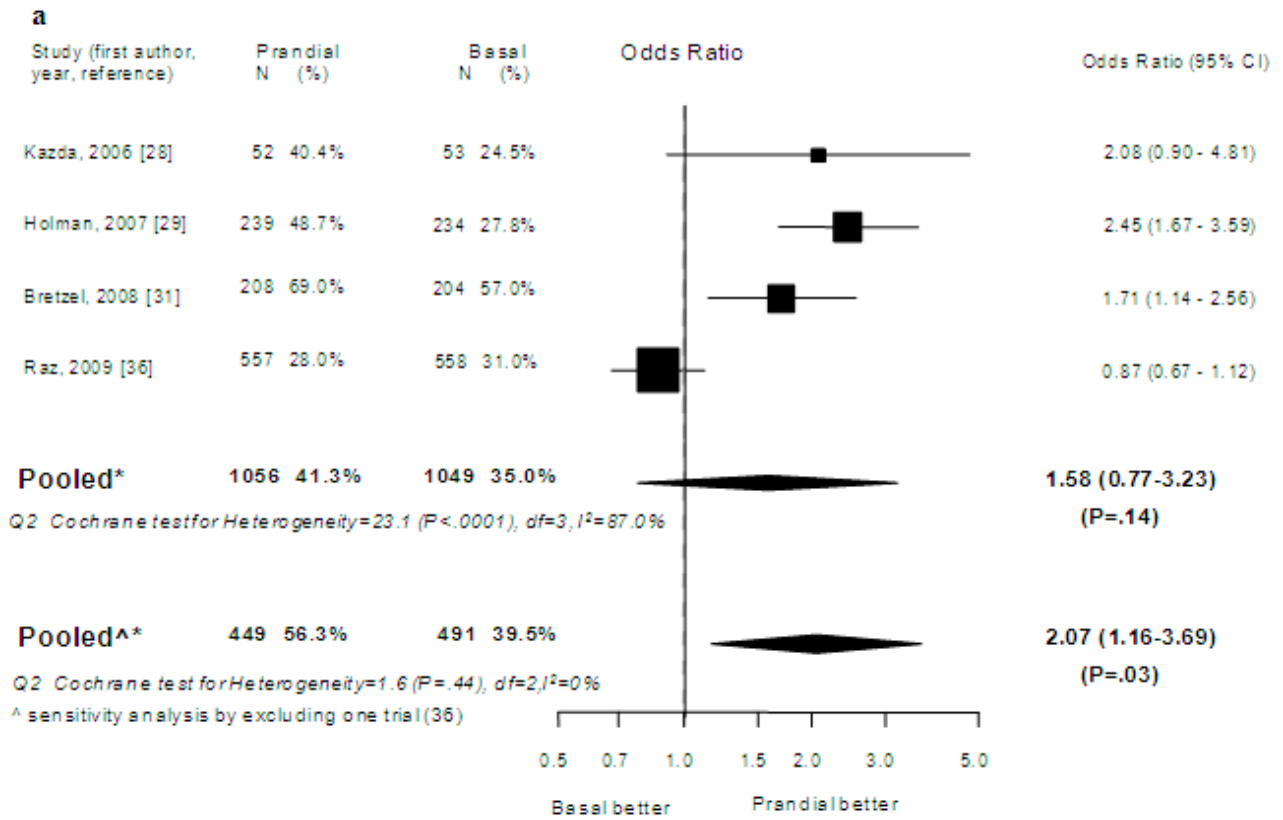

SUPPLEMENTARY DATA

Supplementary Figure 3. Prandial versus basal. Outcome, proportion (%) of patients with HbA1c <7% (a), change in incidence of hypoglycemia (b) and change in weight (c).

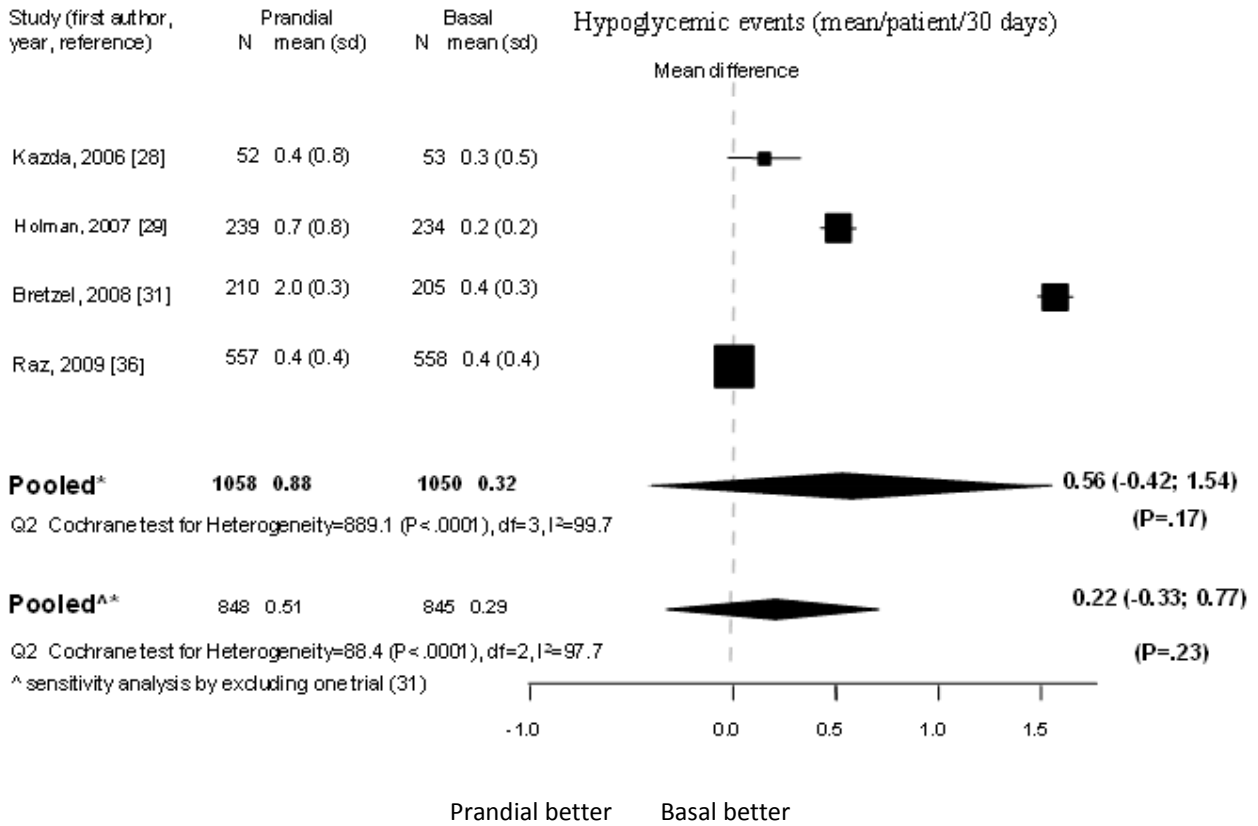

N=number of patients in each arm. *Mixed effect model: estimates adjusted for the correlation within studies and heterogeneity between studies; ^ sensitivity analysis.
