

SUPPLEMENTARY DATA

**Supplementary Table 1. Baseline parameters independently associated with 24h urinary sodium excretion in individuals with type 2 diabetes on multivariate regression modeling**

Baseline parameter	$\beta$ -coefficient	P> z	R <sup>2</sup> change
Age (years)	-0.11	0.01	0.06
Male gender (yes/no)	0.29	0.00	0.06
Estimated GFR (ml/min.1.73m <sup>2</sup> )	0.17	0.00	0.05
Body Mass Index (kg/m <sup>2</sup> )	0.23	0.00	0.02
ACE Inhibition (yes/no)	0.10	0.01	0.01

**Supplementary Figure 1. Disposition of patients with type 2 diabetes during the study and subsequent clinical outcomes**
