Data are mean ± SD in treated set, unless otherwise indicated. Changes from baseline are last value on treatment unless otherwise stated.

*Normalized to standard reference range. [†]Patients in FAS with data available 3-6 weeks after last dose of study medication based on observed results. [‡]Baseline data are mean ± SE, change from baseline data are adjusted mean ± SE based on ANCOVA using LOCF including values on rescue medication; data are week 52 except for follow-up.
