

SUPPLEMENTARY DATA

Supplementary Figure 1. Trial design

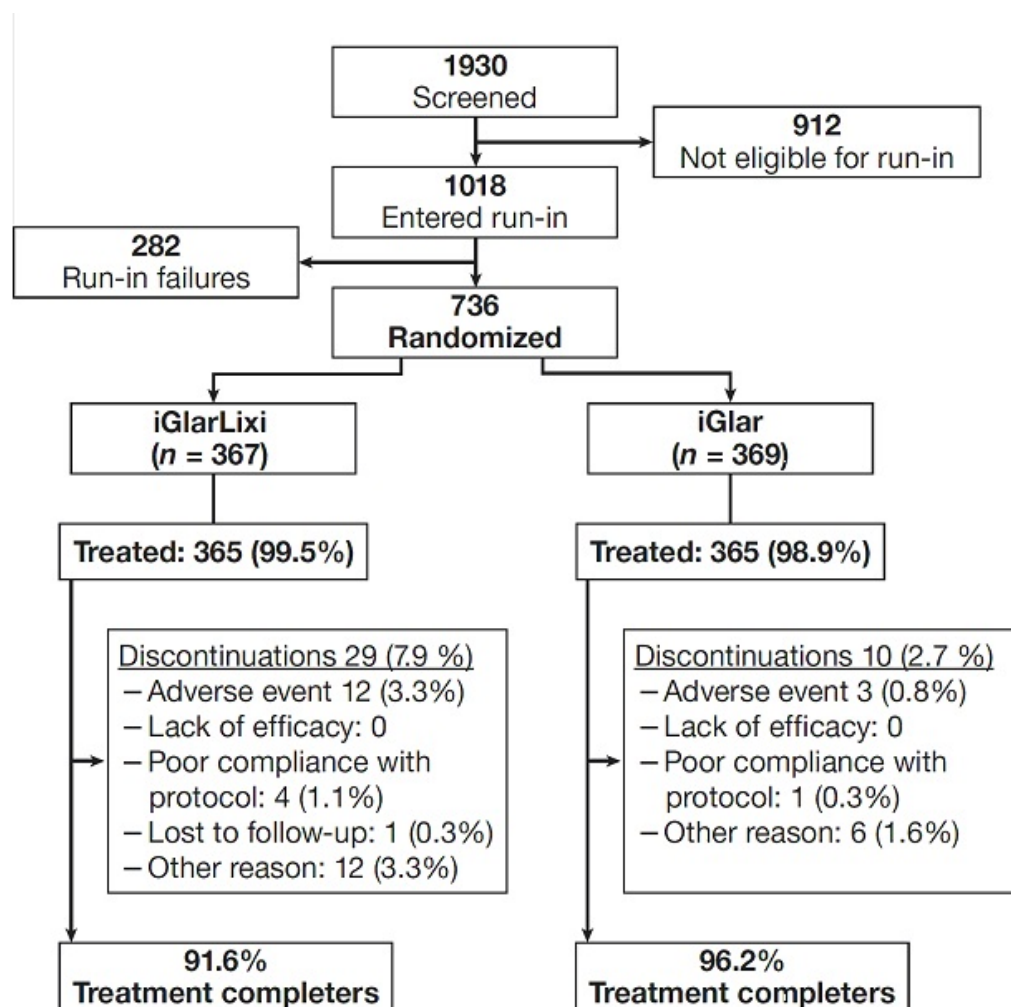

FPG, fasting plasma glucose; iGlar, insulin glargine; iGlarLixi, fixed-ratio combination of insulin glargine and lixisenatide; OAD, oral antidiabetic drug; R, randomization; SMPG, self-monitored plasma glucose

SUPPLEMENTARY DATA

Supplementary Figure 2. Patient disposition

The mITT population included 731 patients. One patient in the iGlarLixi group and four in the iGlar group were excluded because they did not have any post-baseline efficacy data. The safety population included 730 patients as six patients were randomized but not treated (five patients were randomized by mistake and one patient withdrew informed consent).
