

Get the Facts on Diabetes Breakthroughs

Subscribe to American Diabetes Association Journals

DIABETES

The premier journal of basic diabetes research, DIABETES presents the latest laboratory findings from the world's top scientists, plus reviews, editorials, and ADA news. Published monthly with occasional supplements, DIABETES brings you major research studies by Roger Unger, Paul Lacy, Bernard Jeanrenaud, George Eisenbarth and other authorities.

DIABETES CARE

DIABETES CARE presents the latest clinical research from top researchers with analysis and comments on what the new findings mean for you and your patients. A must for practitioners, dietitians, and educators who want to keep up with the latest clinical findings.

DIABETES SPECTRUM

Written for professionals who work day-to-day on the front line of diabetes treatment, DIABETES SPECTRUM translates the latest research into practice. Each issue contains concise, easy-to-follow summaries of the hottest papers in diabetes research, plus tips for treating your patients.

Credit orders accepted. Allow 6-8 weeks for delivery. Canadians add 7% GST tax.

Introducing Diabetes Reviews

Imagine going to a seminar with the world's leading diabetes investigators ... without leaving your office

If you're like the average clinician treating diabetes, you probably have a tough time keeping up with all of the latest basic and clinical diabetes research. *Diabetes Reviews*, the new quarterly review journal from the American Diabetes Association, can help. In its pages, top investigators discuss their latest findings, explain how they relate to previous data, and point out the clinical significance of the work. Each issue is like completing a postgraduate course in diabetes.

Contributors are chosen to offer the broadest possible perspective on a given subject. *Diabetes Reviews* will cover the topics that clinicians face most often, including:

- complications of IDDM and NIDDM
- methods of achieving and effects of good glycemic control
- drug treatment, including mechanism of action
- exercise therapy
- management of lipid disorders
- epidemiology of diabetes and its complications
and much more

Edited by noted diabetes investigator Ralph DeFronzo of the University of Texas, *Diabetes Reviews* will bring you to the frontiers of diabetes research. It is a must read for any clinician who wants to keep up-to-date on the most quickly advancing areas of clinical and basic research.

results in 45
seconds.

Patient's meter
has the same test
procedure as hospital
model.

Teach them once.

For most patients, once is enough with the ONE TOUCH® II Blood Glucose Monitoring System, because it's so simple to use. It features the proven, no-wiping, no-timing ONE TOUCH® technology recommended by more diabetes educators, physicians and pharmacists.* In fact, it has everything patients need in a meter to make their lives easier. And when a meter is this easy for patients to use, compliance is usually improved—and that's key to a healthier life. Better yet, if you are using the ONE TOUCH® Hospital System, the ONE TOUCH® II Meter is even easier to teach, because it uses the same testing procedure. Available at drugstores and home healthcare centers, the ONE TOUCH II Meter comes with a 30-day, money-back guarantee. Not to mention a 24-hour, toll-free customer services line for your patients and a separate Healthcare Professional Hotline for *your* patience. To find out more, call 1 800 524-7226. LifeScan, for diabetes and life.
